

Solution Requirements

Date	15 July 2026
Team ID	xxxxxxx
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

This document defines the Functional & Non-Functional Requirements for Human Development Index(HDI) prediction system.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	Secure Login for authorized users.	High
2	Authorization levels	Role-Based access to the prediction system.	High
3	External interfaces	Accept HDI indicator inputs and dataset integration.	High
4	Transactions processing	Validate user inputs and predict the HDI.	High
5	Reporting	Display predicted HDI value and development category.	Medium
6	Business rules, etc.	Generate predictions based on Life Expectancy, Education	High
7	Compliance to laws	Ensure secure handling of user & dataset information.	High
8	Other	Maintain prediction history & system logs.	Medium

Step 2 :Non-Functional Requirements(NFR)

S.NO	NFR Category	Requirement Description	Target Metric/ Acceptance Criteria
1	Performance & Speed	Fast Prediction response.	< 10 seconds
2	Scalability	Support large HDI datasets.	1000+ records
3	Security & Privacy	Protect user and prediction data.	AES-256
4	Reliability & Availability	High system availability	99.9% accuracy
5	Usability & Accessibility	Simple and responsive user interface	User friendly
6	Other	Easy Maintenance	Modular Design
